

Hunter Home Builders and Remodeling are Chicago area professionals able to help with accessibility reconstruction for your home or business.

We are the accessibility specialists offering wheelchair accessible home and business modifications, remodeling and construction.

Unfortunately builders do not consider the needs of those who are disabled or the future needs in the home as we grow older. Critical walls particularly in the bathroom and throughout the home are seldom reinforced with adequate studding to accommodate grab bars and railings at points where required.

Remodelers not experienced in accessible building may not be aware of these critical requirements creating only the appearance of a safe environment.

Special Needs Remodeling
Home modifications for those that have a disability, use a wheelchair, walker or feel unsteady. This type of remodeling helps you to meet the challenges of independent living.

The term "handicap" can be an offensive choice of words when referring to someone with disabilities. We use this term only with reference to aspects of accessible construction and standards.

We understand that a person who has disabilities would be much less "handicapped" in an accessible environment. Creating accessibility allows a freedom that reduces disabilities.

In addition to remodeling your home we install a wide variety of accessibility and safety products that include bathroom accessories, grab bars and seat units, hand rails in key locations throughout the home, lever door handles and the removal of barriers.

We have the accessible solutions to make life a little easier!

Accessible Living Remodeling

**Kitchens Bathrooms
Room Additions**

Home modifications can ease the tasks of your daily activities of getting around your home or office.

Safer environments can be designed to help prevent accidents for seniors and those that have disabilities.

A variety of designs can be incorporated to increase your independence and safety at home making for a more comfortable environment.

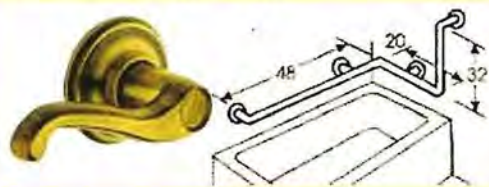

Lever style door handles reduce the efforts of opening doors. Removing raised thresholds between rooms reduce obstacles and is an underestimated cause of falls in the home.

Handrails, grab bars, doorways widened, ramps installed, room sizes altered.

Easy access showers, raised toilet height fixtures, foldout tub/shower seats.

Single lever plumbing fixtures, pullout cabinet drawers, accessible counter tops.

Electrical switches relocated to convenient heights, sensor controlled lighting.

Modifications to our surroundings become necessary as we grow older and face the added challenges to remain living in our individual homes.

Falls are the most common accident around the home and can be prevented by the use of handrails and safety bars to provide stability and the extra support required by people with limited mobility.

Handrails can be used throughout your home to provide safety and help prevent falls along hallways, steps and ramps.

A safety grab bar railing will help you keep your balance, provide a safe, accessible surrounding and reduce your risk of falling. It's the most cost effective home and bathroom modification you can make!

Why choose Hunter Home Builders?

Affordable and Reliable

**Fair Price and Quality Craftmanship
is truly a Value**

We do what we say we'll do.

Because we are an experienced contractor familiar with accessible construction and design.

We truly are interested in helping you be more comfortable and productive by improving the quality of living in your own living space.
